~A NOTE FROM THE BUILDER~

Hello Player.
I am passionate about my craft and I truly strive to create legacy instruments using unique, high end woods, quality finishes, and top shelf components. Each one I build, I keep for a year or more to allow for seasonal changes and the “settling in” process which makes for an instrument that plays rock solid and has that certain played-in feel most players recognize from the first riff.
I hope you enjoy this guitar as much as I enjoyed building it.
